

## Proportions of the Face (Front View at Eye Level)

**Draw the face diagram according to these steps:**

1. Draw an **egg shape** upside down. **Draw Large.**
2. Draw a **horizontal centerline**. This is the **eye line**.
3. Draw a 2<sup>nd</sup> horizontal line halfway down from the eye line to the chin line. This is the **nose line**.
4. Draw a 3<sup>rd</sup> horizontal line halfway down from the nose line to the chin line. This is the **mouth line**.

Copy the words that are highlighted in yellow

**(READ EVERYTHING!):**

1. The **eyes** are **five equal lengths** along the eye line.
2. The **width of the nose** is determined by the **inside corners of the eyes**. (Draw two lines down from the corners down to the nose line.)
3. The **pupils of the eyes** determine the **width of the mouth**. (Draw two lines down from the pupils to the mouth line.)
4. The **length of the ears** is determined by the **top of the eye line to the bottom of the nose line**.
5. The **head, neck, and shoulders** are known as the **“bust”**.
